Rossier Classroom Touch Lighting Systems

Benefits:

By dimming the lighting bank closest to a projector, the projected images will appear brighter to the classroom audience.

With the remainder of room lights turned on, students can still see note-taking devices.

*** There is plenty of light in the room for safe entry and exit of the classroom. ***

Arrange the classroom environment

Locate the lighting control touch panel:

The lighting control touch panel is mounted to the wall near the presentation lectern.

Touch the screen to activate the system.

Arrange the classroom technology

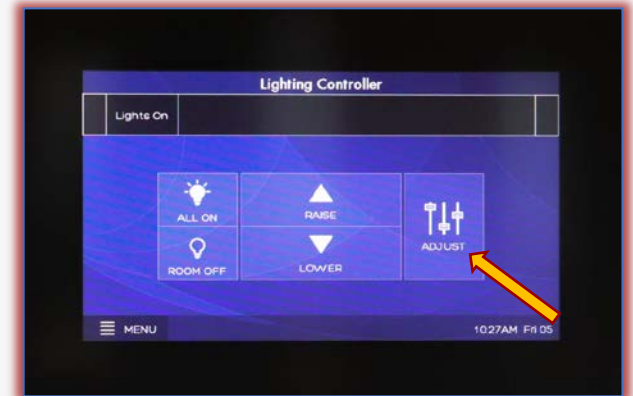

Adjust the individual lighting banks:

First - touch the fader icon labeled “ADJUST.”

Next - touch and hold the slider corresponding to the lighting bank you intend to dim/brighten.

Slowly, slide the virtual fader to your desired lighting intensity preference.

Touch “CLOSE” in the lower right corner to return to the home screen.

Rossier MIS Classroom A/V Support

In-Person Training and A/V Tech Support:

Hours:

- Monday through Friday - 9:00am until 5:00pm
